To Whom It May Concern:

It is my sincere pleasure to submit a letter of endorsement for Austin Hunter in consideration of undergraduate admissions and scholarship opportunities. Austin has been a teen of Jack and Jill of America, Inc., North Houston Suburban Chapter since 2010. As Chapter President, and his designated chaperone during this past 2018 South Central Regional Teen Conference, I have been able to work closely with Austin and can speak to his character and leadership abilities. Austin is one of the most exceptional teen members I have encountered in my 15-year history as a member of our organization.

Austin's academic and personal strengths are as impressive as they come. He has maintained honor roll while playing varsity baseball and being nationally ranked as an All-American athlete throughout high school. Austin is not only a conscientious and personable individual, but he exudes civility, while demonstrating leadership abilities to all that come in contact with him. This was most apparent during our three-day 2018 Regional Teen Conference. Among hundreds of teens, Austin encouraged his fellow chapter members to remain dedicated to serving, learning, and participating in the well-designed conference program. He received special recognition for his art project in the Regional Art Competition and displayed a genuine desire and spirit of service during the conference community service activity.

Austin has my highest recommendation for admission in his pursuit of a career in the engineering field. As an alumnus of Howard University's College of Arts and Sciences and a medical doctor, I believe that Austin will continue to demonstrate the discipline, determination and tenacity that an institution of higher learning requires of all that choose this path to success. Please feel free to contact me at [snjonesmd@hotmail.com](mailto:snjonesmd@hotmail.com) if there are any further questions I may answer.

Sincerely,

  
Dr. Stacey N. Jones-Reed
